

# OrderSavant Mobile

Today's competitive and fast-paced business environment requires mobility. Savance's OrderSavant Mobile delivers. Whether your need is to facilitate the order counter or enhance your sales and service through sales force automation, this hand-held solution will meet your needs. Tailored around the distributor and its sales force, OrderSavant Mobile makes customer service just a tap or scan away.

## Designed for a Mobile Sales Force

Empower your sales staff with the tools to provide instant responses to customer requests. How many times does a sales call lead to an opportunity to take an order or provide a quote? What if you could have a response before even leaving the parking lot? It might just make the difference between getting the order and losing it to a competitor. In addition, you're often judged as a distributor on your ability to provide fast, value-added service to the ordering process. Demonstrate your first-class abilities with OrderSavant Mobile.

## Perfect for Counter Sales

If you have a front counter, OrderSavant Mobile is your ticket to a fast checkout process. After all, your major goal as a distributor is to provide prompt customer service. Your customers do not want to spend their valuable time waiting for your staff to type part numbers and other required fields into the computer. They want to come in, pick out their order, and be on their way. OrderSavant Mobile allows them to do just that.

Feature	Description
