

Do you have issues with keeping your inventory accurate? Are you finding more and more items shipped incorrectly? Do you receive material in full and wait until it is too late to find out you were short shipped? Do you dread inventory counting? If you answered yes to any of these, WarehouseSavant is the product for you!

Easy to Use

Accurately and efficiently ship, receive, count, and capture signatures - virtually eliminating the paper trail. With the handheld scanner interface, handwriting and product part number interpretation errors are eliminated. Your users will just scan a package or the part's bar code and complete the same job in a fraction of the time.

Designed for Warehouses of Any Size

If you have one hundred thousand dollars worth of inventory or ten million dollars worth of inventory, WarehouseSavant can help you streamline your entire warehouse and improve the accuracy of your inventory. With WarehouseSavant, you will know exactly what you have in your inventory the next time a customer asks.

Feature	Description
Shipping	Pick, pack, route, and ship orders using a wireless handheld barcode scanner to help eliminate handwriting and product identification errors.
Receiving	Receive and put away items efficiently and improve accuracy by utilizing and training barcodes.
Manifest Manager and Signature Capture	Manage routes and capture signatures just like UPS.
Cycle Counting	Easily set up cycle counts and use a handheld scanner to perform the count. Set up discrepancy levels that alert the user if they possibly entered an incorrect count. Review progress and acknowledge discrepancies during the count.
